The Bartec USA Mission

To offer a range of high quality products that the automotive aftermarket desires, while providing the very best support for all of our customers!

Since 2004, Bartec USA has played a significant and leading role in the development and implementation of TPMS Technology in the North American Market. Whether it is the hundreds of plant installs, the many thousands of OE dealer tools, the tens of thousands of aftermarket tools, our experience, technical ability and customer service are the reasons why we’ve been a stable and consistent force in the automotive aftermarket!

Bartec USA is part of the Bartec Group, and together we have changed the automotive aftermarket service industry! Bartec’s many “First-To-Market” solutions have revolutionized the way the industry diagnoses and services TPMS! Bartec TPMS Tools are known throughout the industry as the standard for quality, features, ease of use and vehicle coverage. All of this is backed by a TPMS Technical Support Team is second to none, in the world of automotive aftermarket technical support!

For myself, I have been part of the amazing team at Bartec USA since February of 2005, and am proud to be associated with the most dedicated and customer oriented team in the industry, and would put our team up against any in the world in terms of knowledge, customer support and commitment to getting the job done right!

Bartec USA is unique in that we understand that TPMS is more than tools. We are committed to helping our customers find success in TPMS! To that end, we are always looking for ways to improve our service. The Bartec USA team is here to serve you! Contact us today and talk to our team about your specific requirements or problem.

Sincerely,

Scot Holloway
C.E.O. and General Manager
Bartec USA, LLC
The Bartec’s Sales team is top notch. Their combined experience and knowledge is evident as they TEACH ABOUT TPMS, rather than just sell. The Sales Managers at Bartec are committed to informing you of the REAL WORLD TPMS scenarios and how our offering is the proper solution to help you be successful with TPMS! As we expand our business, our seasoned sales team will be able to demonstrate their experience and skill in a greater range of automotive service products.

Replacement parts, Mechanical Tools, Cables, Cradles, Printers, and Accessories are covered under a 6 month warranty. Repairs are covered under a 90-Day Limited Factory Warranty. The Tech400Pro tool is covered under a TWO year factory warranty.

Re-stocking Policy: 25% re-stocking fee will be applied for returned items. All returns must be pre-approved by Bartec before issuing a return Authorization Number.
Table of Contents

Bartec USA Tools earn industry recognition each and every year. Our mission is to listen to the voice of the customer and make certain that our products reflect their needs and wants. We believe that our continued success is a reflection of that commitment! In 2018, the Tech1000 won Motor’s Top 20 Tool, and the QST250 was a THREE time winner as it was named the Top 10 Tool, winner of PTEN’s Innovation Award PTEN’s People’s Choice award!
The Next Generation in TPMS Tools are based on Bartec’s latest platform design. Today’s automotive service professional needs tools that are scalable and are easy to learn and operate. Think of the Tech1000 as a “TPMS tablet” capable of doing everything that you would expect from a Bartec service tool, only MUCH more!

Features:
- Graphical User Interface
- Touchscreen
- Completely wireless including VCI
- Internet connectivity
- High resolution camera
- Bar code scanning technology
- Scalable software platform

Benefits:
- Easy to learn and easy to operate
- Faster diagnostics and service
- Communicate wirelessly between, vehicle, tool, other devices and Service Center
- Send data from the tool to remote sites
- Scan VIN’s, license plates and take photos of key vehicle issues
- Scan the bar code to initiate the service process
- Flexible software means the tool grows with your business

The Tech1000 has been recognized as a leading TPMS tool by winning Motor Magazine’s prestigious Top 20 Tools award for 2018

The Tech1000 comes with TWO YEARS of software and TWO YEARS factory warranty - STANDARD!

The TPMS Pro Series tools are designed for the automotive service professional. The Tech300Pro is the entry level TPMS tool that allows you to grow TPMS service at the pace of your business. The Tech300Pro is an activation only tool, that has loads of features your typical activation only tool doesn’t have. When it makes sense to upgrade your service capability, the Tech300Pro upgrades to a TPMS OBD Tool!

Features:

- Activation Only Entry Level Tool
- Wireless Bluetooth Data Transfer
- Inductive Charging Capable
- Programs Aftermarket Sensors
- Works with Multi-Protocol Sensors
- TIA Inside Technology
- Upgrades to a TPMS OBDII Scan Tool

Benefits:

- An upgradeable tool means you decide when you need greater tool function
- Functions seamlessly with your OE or aftermarket scan tool
- Greater vehicle coverage means saying YES to customers more often
- Easy-to-use, easy-to-operate means anyone in your business can use this tool
- Comprehensive Vehicle Inspection Report makes discussing TPMS with your customers effective and easy.
The Tech300Pro is easily upgraded to an OBDII style TPMS tool. Purchase the OBDII Upgrade Module Kit from an authorized Bartec USA Distributor and follow the easy to do upgrade process.

P/N: WRT300PRO

855-877-9732
The industry’s first ALL-IN-ONE tire inspection tool, combining the testing and measurement of Tread Depth, TPMS and Tire Pressure in a single, easy to operate tool. The Tech200Pro has all of the rock solid TPMS testing capability you’ve come to expect from a Bartec tool, combined with state of the art depth measurement, and the ability to take “stick pressure” as well. All of this data is displayed on a high resolution color display and can be transmitted via wireless Bluetooth.

Features:
- High Resolution Display
- Protective Rubber Boot
- Very accurate measuring systems
- Activates known TPMS Sensors
- Bluetooth Capable
- LED Flashlight Integrated

Benefits:
- Easy to read, even in day light
- Made to survive a rugged workshop
- Pressure: ±1 PSI  Tread Depth: ±.004”
- Easily and accurately validate sensors
- Send tire and TPMS data to your computer
- Light up the workspace for faster service

Kit includes:
- Tech200Pro Tool
- Wall Mounted Charging Cradle
- Power Supply
- Air Pressure Hose
- Quick Start Guide
- CD

Inspect more tires - SELL MORE TIRES!
The ultimate in **Test Before You Touch!**

**Test TPMS Sensors**
Test the TPMS sensors for fit and function. Know the sensors are working and that they are the proper ones for this vehicle!

**Measure Remaining Tread**
Easily and accurately measure the tread in three places. Know the exact amount of remaining tread as well as the tread profile!

**Check Tire Pressure**
In the event of an indirect TPMS or maybe the sensor isn’t working. Measure tire pressure the “old fashioned” way and connect to the valve stem!

Bartec charges for software updates for our range of TPMS Tools. We are often asked why we charge for software. Bartec remains committed to the development and testing of software, sensors and vehicles, to continually add value to our range of tools. No other TPMS Tool company tests and validates to the extent Bartec does. Beware the “free tool” and “free software” schemes. If everything’s “free” what do they owe you next year, or three years from now? Bartec routinely provides 3-4 tool updates per year; adding features, function and coverage!

As vehicle technology increases, so does the complexity of the repair process. Increasingly there are more vehicles that require a scan tool to do even the simplest of repairs. The Quick Service Tool line from Bartec is designed to offer powerful yet affordable tool solutions for services like Oil Changes, Brake Pad Replacement and Battery Replacement. The QST300 is the first tool of its kind that combines all three of these services into a single tool.

Keep your complex scan tool working on higher paying, more complicated service work, and use the QST300 instead. The QST300 is an easy to setup and easy to operate tool that resets the Change Oil Light, Relaxes the rear, electronic parking brake, and registers a new battery upon installation.

**Features:**
- Battery Validation and Relearn
- Electronic Park Brake [EPB] disengage
- Oil Light Reset
- Easy to read display
- Powered by the car

**Benefits:**
- Relearn/validate new batteries in minutes
- Relaxes brake for pad replacement and code clearing
- Easily reset oil life management systems
- No batteries or charging necessary

www.bartecusa.com
Your QST300 comes with Battery Relearn, Oil Light Reset and Electronic Parking Brake disengage. However this tool is flexible and can grow with your business. This year Bartec is adding a number of new functions that will make your Quick Service Tool even more valuable and a greater return on your investment! Simply purchase the desired application certificate from an authorized Bartec dealer. Launch the Bartec Suite and enter the code when prompted, and you have the additional feature! **As a bonus, your annual renewal anniversary resets to the date you activate the new application!**

- **Battery Relearn**

855-877-9732
The first tool for checking ultrasonic parking sensors! The QST250 quickly tests the sensor for function, relative signal strength and frequency. The QST250 comes with a remote probe so techs can work alone to determine the functionality of a vehicle's parking sensors. Simply aim the tool at the sensor directly in next to the sensor.

**Features:**
- Wired Detector Extension
- LCD Screen
- Automatic test procedure
- Frequency Meter
- Signal Strength Meter
- Low battery warning and auto switch off time

**Benefits:**
- One person operation
- Gives a graphic visual display of sensor output
- Allows full vehicle test with a visual comparison of each sensor
- Confirms correct sensor is fitted
- Helps to identify sensors which are still operating but out of specification
- Operational time of over 20 hours powered by (4) AAA batteries

**Kit includes:**
- QST250 Tool
- Remote Test Probe
- 4 AAA Batteries
- Quick Start Guide
- CD

Three time winner in 2018!

Position Tool Next to Sensor

Use Remote Lead and Work from in the Vehicle
Today's vehicles have higher power demands and this means bigger batteries and sometimes multiple batteries. Keeping these batteries charged requires sophisticated technology. For the technician this means when replacing the battery, you've got to complete a relearn. Previously, a scan tool was required for this final step to a new battery install. The QST200, easily and quickly leads the technician through the reset process. Part of the Bartec Quick Service Range of tools, the QST200 easily updates using the Bartec Suite. The first year’s updates are included.

Features:
- Specific Purpose tool
- Graphical menu design
- Large display
- Tool draws power from OBDII Connector
- Bartec Tool Suite included
- Robust OBD Cable included

Benefits:
- Easy to use and frees up scan tool
- Intuitive and easy to operate
- Easy to read in any light condition
- Batteries not required
- Makes updating tool fast and easy
- Many years of service

Kit includes:
- QST200 Tool
- OBDII Cable
- Quick Start Guide
- CD

Relearn the Battery Management System after a new battery install!
The Oil Service Light tool is an easy to use tool for resetting the service light on the instrument cluster. Some vehicles require a scan tool for this step, others offer a manual method. In either case, the QST150, easily and quickly leads the technician through the reset process Part of the Bartec Quick Service Range of tools, the QST150 easily updates using the Bartec Suite, first year’s updates included.

**Features:**
- Specific Purpose tool
- Graphical menu design
- Large display
- Tool draws power from OBDII Connector
- Bartec Tool Suite included
- Robust OBD Cable included

**Benefits:**
- Easy to use and frees up scan tool
- Intuitive and easy to operate
- Easy to read in any light condition
- Batteries not required
- Makes updating tool fast and easy
- Many years of service

**Kit includes:**
- QST150 Tool
- OBDII Cable
- Quick Start Guide
- CD

P/N: BSTQST150

Quickly reset the oil service light!
The Electronic Parking Brake tool is an easy to use tool for dis-engaging electronic parking brakes. Previously, a scan tool was required for this first step to a brake job. The QST100, easily and quickly "unwinds" the brake caliper leaving the expensive scan tool free for more complicated work. Part of the Bartec Quick Service Range of tools. Tool easily updates through the Bartec Suite, first year’s updates included.

Features:

- Specific Purpose tool
- Graphical menu design
- Large display
- Tool draws power from OBDII Connector
- Bartec Tool Suite included
- Robust OBD Cable included

Benefits:

- Easy to use and frees up scan tool
- Intuitive and easy to operate
- Easy to read in any light condition
- Batteries not required
- Makes updating tool fast and easy
- Many years of service

Kit includes:
- QST100 Tool
- OBDII Cable
- Quick Start Guide
- CD

If the vehicle has a button similar to this for setting the parking brake, it has electronic parking brakes.

Properly and safely disengage the electronic parking brake for service, using the QST100!
The TPG200 is our mid range Tread Depth and Tire Pressure checker. This rugged tool measures the tire in three places, easily showing the profile as well as tread depth. The TPG200 also measure tire pressure with the detachable air chuck and hose, included with the tool. The easy to read display, even sunlight, show all the important information. Once the tires are tested, send the data wirelessly to the computer using the Bluetooth radio.

**Features:**
- High resolution color display, sunlight readable
- Maximum tread depth of 22mm
- Pressure range 0-10bar (0-150PSI)
- Pressure accuracy +/-0.07bar (+-1PSI)
- Bluetooth for wireless data transfer
- Wireless, inductive charging [cradle]
- Built in lamp for illuminating tire surface

**Benefits:**
- Tread depth and pressure in one tool can capture all four wheels in under one minute
- No need to connect to another tool, Bluetooth communications
- Red-amber-green intuitive user interface
- Works with TPMS Desktop – data management
- Ergonomic, and low profile for ease of accessing the tire
- Increases consumer confidence leading to increased tire sales

P/N: BSTTPG200

www.bartecusa.com
The TPG100 is an easy to use, entry level Tread Depth and Tire Pressure Gauge. Despite its ease of use it offers high tech capability. The TPG100 Measures Tire Pressure and Tread Depth. Easily measure tire tread depth and measure tire pressure, then send the data to your smart phone via Bluetooth! The phone app is available for iPhone and Android and is free to download. Use the app and your phone to scan the VIN, look up vehicle information and then collect the data from the tool.

**Features:**
- Tire Pressure Measuring
- Pressure Measurement Range 3-150PSI
- Tread Depth Measuring
- Tread Depth Range of 0-1 inch
- Bright LED Display
- LED Flashlight
- Bluetooth Compatible

**Benefits:**
- C.A.R.B. compliant accuracy of ±2 PSI
- Works the full range of passenger car and light truck applications
- Measures tread depth within ±2mm [.078”]
- Works on most passenger cars and light trucks
- Easy to read, even in daylight
- Can work in low light conditions
- Works with PC’s as well as Smart Phones

Download the free smart phone app at Google Play™ or App Store™ by first searching “Bartecusa”

Tool includes a quick start guide, carry pouch and 2 - CR2032 batteries

Service Center is a new concept in tire and inspection tools, combining optimized workflows with Bartec USA’s market leading technical support, tool management and real-time management information.

Service Center is available as a browser, PC and mobile applications and works the way you do. Every tire and vehicle service record is stored securely online and is shared throughout your shops so you can seamlessly work between the front counter, the back shop or at the vehicle. You can see the status of every job you do and every Bartec tool you use, maximizing revenue and ensuring that your customers receive a first class service every time.

**Service Center Ideal For**
- Tire Service Shops and Retailers
- Automotive Repair Facilities
- Branded Auto Repair Companies
- Any automotive service company that services wheels and tires
Bartec’s legendary Inspection Report is now supercharged! You can show it to your customer on a tablet, on a Smart TV in your waiting room or send it direct to their smartphone. The required work is instantly shared with your iShop-compliant point of sale system so you can check stock and make the sale with minimum fuss and no paper!

Service Center Features
- Start for free, add on services as you need them
- Enterprise-grade security at all levels
- Access your information from anywhere
- Sales-winning Inspection reports
- Industry-leading Stationary and OBD relearn information
- Integrates with point-of-sale and fleet management systems
- Store all your service data securely on our servers

At Bartec USA, we call it extreme support because we take very seriously the responsibility of caring for our customers. Whether it is training and supporting our distributor partners, or training the technician who purchased the tool, Bartec is second to none when it comes to customer support! Support before, during and after the sale. Bartec USA is committed to making sure that our customers get the most from their investment in a Bartec tool.

The Bartec Group’s Technical Support Team spans two continents and 12 time zones. These uniquely trained individuals are qualified and certified in TPMS diagnostics, and are perhaps the very best in all the world. Their mission each and every day is to make certain that ALL of Bartec’s customers, world wide, are successful using our diagnostic tools, and more importantly, successful in taking proper care of THEIR customers, the consumer!

Our Global Tech Support team covers our complete range of tools and products and speak a range of languages including English, Spanish, French and German, and stand at the ready to help customers sort out TPMS challenges. The Bartec has offices in the United States, the United Kingdom, Germany, South Korea, and China.
