

Bartec TPMS Tools

TECH300PROC

The TPMS Pro Series tools are designed for the automotive service professional. The Tech300ProC with OBDII is the mid-level TPMS scan tool. This tool includes OBD relearn support right out of the box. With wireless Bluetooth data transfer, the Tech300ProC allows for easy use of the comprehensive inspection report.

The included TPMS technology provides greater flexibility in TPMS service and use of TPMS sensor solutions. The comprehensive OBD relearn coverage for import and domestic vehicles gives you the power to say “Yes” to more customers.

Features

- Advanced TPMS technology including class-leading OBDII relearn coverage for import and domestic vehicles
- Programs most aftermarket replacement sensors
- Wireless connections with Bluetooth
- TIA On-Tool Relearn Reference and troubleshooting Tech Tips
