

**A** Capture Sensor ID

**B** Connect to OBD

**C** Program Sensor IDs

# TECH500

Part Number:  
WRT500

## Premium TPMS Diagnostic and Service Tool

The industry leading Tech400SD has set the standard for TPMS Service Tools. The Tech500 has all the functions of the Tech400SD plus many new and unique features and benefits!

**FEATURES:**

- Bluetooth® communications to PC (Bluetooth® Dongle included)
- Wi-Fi connectivity to the TPMS Desktop
- Inductive Charging (Pad included)
- Robust, all-in-one design and OBDII Cable
- Market-leading expanded OBDII coverage including Chrysler, Ford, GM, Mitsubishi and Volvo
- Advance RKE (Key Fob) Testing for "iKey" and similar systems
- Process Driven Menu Flow
- Aftermarket Sensor Programming
- Onboard TPMS service information
- Standard RKE (Key Fob) and UHF detection
- Diagnostic Trouble Code Detection (DTC)
- Original Equipment sensor coverage
- Bartec Audit Report

**BENEFITS:**

- Easily send the Bartec Audit report to the front counter.
- Update the tool and send info to a network printer.
- Charge tool by simply setting on the inductive charging pad.
- Rugged tool enclosure with molded rubber protection and heavy duty OBDII cable means more time fixing cars.
- Fix more cars – service more customers – make more profit servicing TPMS. Bartec is first to market with an OBD II solution.
- Test the communication between the car and the key fob on today's advanced keyless entry systems (where available).
- Easily navigate from Test Before You Touch to the finishing step; the TPMS Relearn by using the Bartec original Make-Model-Year look up.
- Easily program the most popular aftermarket sensors such as the Alligator sens.it® and the Schrader EZ-sensor.™
- Relearns, tech tips and TSB's all in the palm of your hand makes diagnostics and servicing faster and easier.
- Test basic key fob function and look for other RF signals during TPMS diagnostics
- Activate and decode all known, "LF activated" TPMS sensors.
- User can quickly scroll down to an exact vehicle specification.
- The most comprehensive "TPMS health check" available. Quickly and easily show customers the status of their TPMS before and after service.
- Update the tool software using Wi-Fi, removable SD card or connecting to a PC.

**Tech500 Specifications:**

Display: OLED 2.375" x 1.5"  
 Interface (s):  
 - USB: Charging, data and updating  
 - DB15: OBDII Communication to vehicle  
 Complete Kit Weight: 5 lbs.  
 Length: 15"  
 Width: 10.625"  
 Height 3.75"  
 Battery: Lithium Ion, rechargeable, inductive charging ability

**Tech500 Kit Includes:**

- Tech500 Tool
- Quick Start Guide
- User Guide
- Activation Magnet
- OBDII Cable
- Power Supply
- USB Cable
- CD
- Inductive charger
- Bluetooth adapter
- First year's software access\*

\*First year – free software updates begin with tool registration on the website or mail-in card!

Part Number: WRT500
