Note: Battery value or state displayed is a direct output from the sensor and is not an interpretation on the part of Bartec.
 The TPMS information is provided as-is and Bartec does not warrant, implied or otherwise, the accuracy or reliability of the information or our own side, with the expressed limitation of liability.
 LIMITATION OF LIABILITY: BARTEC, AUTO-EDITS OR BARTEC, OR LSC, SHALL NOT BE LIABLE FOR ANY LOSS OF PROFITS, LOSS OF TIME, LOSS OF DATA, OR INTERRUPTION OF BUSINESS, TO THE EXTENT OF SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY KIND.
 WHETHER UNDER THIS AGREEMENT OR OTHERWISE.

Bartec was the very first to create the TPMS audit report! Way back in 2006 with the creation of the Tech300, Bartec invented the TPMS Audit Report. In these early days we were able to provide sensor information like battery state, sensor ID's, pressure and temperature.

Of course as our tool's capabilities increased, so did the information contained on the TPMS Audit Report. Now, with the Tech400Pro for instance, the TPMS Audit Report includes the VIN, Tool Info, Sensor ID's by position as read and in the BCM, part numbers, sensor state, Placard Values [before and after] and Diagnostic Trouble Codes [DTC's].

BEST PRACTICE - When doing TEST BEFORE TOUCH, print the BEFORE TPMS Audit Report. This is an effective communication tool when explaining to a customer their vehicle's condition. When the repair is complete, print the AFTER TPMS Audit Report and show evidence of their TPMS being operative.
