

FEATURE: OBDII Relearn for Ford Vehicles

BENEFIT: Complete the relearn FASTER and more accurately

FIRST AVAILABLE: Software update 49

WHAT TOOLS: Tech400Pro, Tech500, Tech300ProC,
and Tech400SD

WHAT'S NEEDED: Simply update your tool

Tech400Pro connected to OBDII port.

Industry first OBD RELEARN and DIAGNOSTICS coverage, for Ford STATIONARY RELEARN vehicles. As you know, sometimes getting these vehicles into learn mode is a challenge. Doing the TPMS “Hokey Pokey” trying to get the horn to honk is often times frustrating.

With these Bartec TPMS Tools, now you can complete the relearn through the OBDII connection. This is much faster, accurate, and you do NOT have to struggle with getting the vehicle into to relearn mode. Additionally you can access the existing sensor IDS and Diagnostic Trouble Codes to be able to complete TPMS Diagnostics, or in some cases adjust the placard.

BEST PRACTICE - COMPLETING TPMS RELEARNS THROUGH THE OBDII WHENEVER POSSIBLE LIMITS CONFUSION, IS FASTER AND REDUCES THE NUMBER OF STEPS INVOLVED. BARTEC IS ON A MISSION TO HAVE AS MANY OBDII RELEARNS AS POSSIBLE.
