TSB #	SUBJECT	DATE
GI202512-52	Ford Push Button Stationary TPMS Relearn	1/7/2026

Overview:

Certain Ford, Lincoln, and Mercury vehicles are equipped with a Keyless Start (push-button) ignition system. The stationary TPMS relearn procedure can be successfully completed on these vehicles by utilizing the specific push-button sequencing outlined below.

Procedure:

Method 1: Standard Push-Button Ignition

Applies to vehicles where one press cycles the ignition to ACC or RUN mode without starting the engine.

***DO NOT wait more than 1 second in between button presses**

1. Engage the parking brake and inflate all tires.
2. With the vehicle OFF, press and release the brake pedal.
3. Press the START button 5 times (ending in the RUN position).
4. Press and release the brake pedal.
5. Press the START button 6 times (ending in the RUN position).
6. A single horn chirp will indicate the TPMS relearn mode is active.

Method 2: Intelligent Access Ignition

Applies to vehicles where the button must be pressed twice to enter RUN mode without starting the engine.

***DO NOT wait more than 1 second in between button presses**

1. Engage the parking brake and inflate all tires.
2. With the vehicle OFF, press and release the brake pedal.
3. Press the START button 8 times (ending in the RUN position).
4. Press and release the brake pedal.
5. Press the START button 9 times (ending in the RUN position).
6. A single horn chirp will indicate the TPMS relearn mode is active.

Method B: Long-Press Ignition Cycle

Applies to vehicles where the button must be pressed and held until the vehicle is in RUN mode (push, wait for sound, release). Power off by pushing the button 1 time.

1. Engage parking brake and ensure vehicle is **OFF**.
2. Press and release the brake pedal.
3. **Press and hold** the START button (approx. 2 seconds) until the ignition enters RUN mode (engine off)
4. Press the START button 1 time to power off. Repeat this cycle 3 times, ending in the RUN position.
5. Press and release the brake pedal.
6. **Press and hold** the START button to cycle the ignition 3 times, ending in the RUN position.
7. The horn will chirp once to confirm Relearn Mode is active.
