

If you need to go through the update process manually, click the “Update” tab. Your list of registered tools should now be displayed.

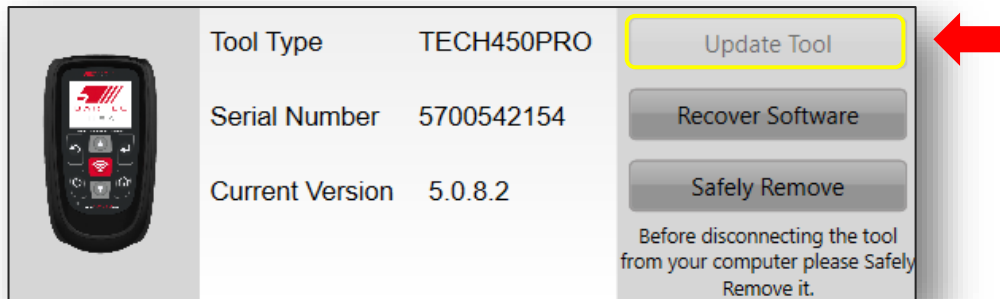

1. If using a Gen-I Pro Series such as Tech400PRO®, your tool must be in “Update Mode”. Before plugging into PC. (450PRO, 550PRO, 600PRO and TechRITEPRO® DO NOT need to be put into update mode)
  - a. For the Gen1 Pro Series With the tool completely powered off hold the “ENTER” button and press the “Power Button”. The tool should display UPDATE MODE V# at the top of the screen.
  - b. You can also get into Update Mode by going to “My Tool” → “Software Updates” → “Enter Update Mode.”
2. If using a Gen-II Pro Series connect your Bartec USA® TPMS tool via USB cable to your PC. TPMS Desktop™ will recognize the connected tool. Follow the on-screen prompts. (Note: If your PC does not recognize the tool, try pressing the Refresh button).

3. Once the tool is connected or in update mode and connected to your PC, the file will download to your tool. **\*DO NOT DISCONNECT your tool until prompted to do so by the PC software.**
4. Once the file is downloaded to the tool, the update will start automatically. Once completed, the tool will power off. Upon powering up, you should get a “Tool update successful” message.

**Software Support:**

If your software support has expired or the “Update Tool” button is greyed out, please contact your distributor for a new Software Update License. For additional help please reach out to Bartec USA® Technical Support at (866) 407-8767.
