Tool Software Update

Multiple Software Types

In order to better manage the available aftermarket sensor coverage, this release will have multiple software types for the Tech400SD, 500, and PRO-SERIES tools. This multi-software approach will keep your Bartec tools up to date with the major aftermarket sensor suppliers, and with the Tech400SD being extend through 2021 [with an active software license], you will be able to use the tools longer!

Tool Software Update

Updated LF Management

Optimizes and increases the number of LF activations between battery charging cycles.

Tool Battery Management

To make sure the user of the tool has plenty of notice before charging is required, there is now a “two-step” warning process.

NOTE: First warning will allow you to complete the current vehicle being serviced. Always charge your tool when recommended!

MAC Address

To better assist in connecting the Tech400Pro and Tech500 tools to your network, the tool's MAC address is now displayed under tool settings.

REDI-Sensor Unlock

The updated REDI-Sensor unlock in the Tool Kit allows the user to use unlock two sensors as one selection, Unlock REDI V2A will unlock the REDI 7002A and 10002A, Unlock REDI V3A will unlock the REDI 7003A and 10003A. Unlock REDI V5 or the REDI SE10005. REDI SE10005 Coverage updated for the following manufactures in blue:

Manufactures			
Buick	GMC	Fiat	Chrysler
Cadillac	Hyundai	Subaru	Nissan
Chevrolet	Jeep	Ram	Dodge

John Dow DVT Pro-Select Programmable Sensors Coverage

Updated coverage (grey) for the DVT Pro-Select TPMS

Sensors:

- DVT-P3152 DVT Pro-Select 315 MHz
