

## Software Update

TSB #	SUBJECT	DATE
SRB-TPMS_DT_3_4	Software Update for TPMS Desktop	April 3, 2017
S/W VERSION[S]	PRODUCT[S] AFFECTED	
3.4.1.2	TPMS Desktop	

### Overview

The following describes the latest software update for Bartec's TPMS Desktop. This update will improve the connection between your Bartec TPMS tool and the TPMS Desktop.

Feature	Industry Exclusive	Benefit	TPMS Desktop
Improved tool connection and database for registered tools		Bartec has improved the database for handling registered tools and software update deployment. This will improve the update process using TPMS Desktop	✓

### Issues that had been discovered:

- Tool not recognized when connected to TPMS Desktop
- Problems during installation of TPMS Desktop
- Tools showing incorrect status (example: Tools showing as not registered when it actually is registered)

### Resolution:

- Updated the installation process
- TPMS Desktop Database was updated and improved to insure that proper messaging is displayed when your Bartec TPMS tool [while in update mode] is connected.
